The player must plant the plants, harvest, earn money and invest in business development. The biggest news compared to previous page views is the addition of forests, from which we can obtain wood. Farming Simulator 16 is released on Android simulator farmer work. The project has developed a studio Giants Software, the same team that was behind the earlier revelations from the series. The game traditionally takes on the farmer's farm a modest farm and our task is to redevelop the estate into a real ranching empire. Realization of this ambition naturally requires planting and collecting crops. Earned this way, we invest the money back into your own business by buying more and better equipment and expanding into new markets. During the game, the player must provide both a strategic part of the total project, which has a budget manage the sales and personally direct the machine when working in the field. The action takes place in a world of open structure, and the fun we use more than fifty types of machines. The authors have acquired all the necessary licenses, so Follow vehicles meticulously reconstructed based on real models. Compared to the previous episode of the series came naturally new types of crops, including we find potatoes, corn, wheat, sugar beet and canola. By far the biggest news, but it's an introduction to the game of forests. Players were given a large set of machines to cut down trees and wood, which provides them with an additional source of income. Anything we can play alone or as part of a local multiplayer mode, in which different players join forces to develop more revenue than they could do alone. In addition, Farming Simulator brings 16 major improvements in graphic design, so that both maps and vehicles can boast significantly higher levels of detail.
